PROFILE

Dedicated and innovative developer specializing in the Microsoft Power Platform to deliver high-impact, low-code business solutions. Proficient in utilizing Power Apps and integrating business processes via Power Automate. Experienced in data modeling and management within the Power Platform ecosystem, leveraging Dataverse for secure, enterprise-grade data handling. Successfully developed a production-level application for Ethiopian Airlines, demonstrating strong capabilities in collaborative development and translating complex business requirements into robust, automated solutions. Supplemental technical expertise in full-stack development (C#, .NET, JavaScript) allows for the enhancement of Power Platform solutions with custom connectors and advanced formulas when required. Adept at problem-solving and delivering excellent UI/UX design.

WORK EXPERIENCE

Ethiopian Shipping and Logistics SEPTEMBER/2022 - DECEMBER/2022 IT Support Intern

- Worked on the data center being implemented at the time.
- Worked as an IT support team member.
- Helped maintain the smooth work order
- Diagnosed and resolved hardware, software, and network-related issues in a timely manner.
- Responded to IT support requests and provided technical support over the phone and remotely.

Ethiopian Airlines JULY/2024 - JUNE/2025 Software Development Intern

- Developed a high-quality proprietary software application for internal use.
- Utilized DevOps in the project timeline.
- Created user interfaces to ensure a user-friendly experience
- Garnered user acceptance in a meeting of over a hundred high ranking employees around the world.

Vision Vertex Solutions JULY2025 - PRESENT Junior Developer

- Proficiently developed and deployed custom Power Apps solutions, s to address specific enterprise business requirements.
- Led or contributed significantly to client requirement gathering sessions and translated functional needs into intuitive Power Apps design and architecture specifications.
- Designed and implemented complex business process flows using Power Automate (Flows) to automate tasks, integrate systems, and streamline operations.
- Developed interactive AI agents to help with customer and client needs.

Eaglepoint AI

March 2026 - PRESENT

Mid Level Software Consultant

- Designed, developed, tested, and maintained software applications for AI training and software development projects.
- Built and validated end-to-end application features, APIs, Dockerized services, and supporting test suites.
- Contributed to AI model capability evaluation workflows through high-quality software task execution and dataset preparation.
- Produced self-test reports, validation artifacts, README documentation, and reproducible project deliverables.
- Collaborated with team leads and reviewers to resolve implementation issues, meet delivery deadlines, and maintain quality standards.

EDUCATION

Bachelors of Science in Software Engineering

JUNE/2021 - JUNE/2025

School of Engineering | Addis Ababa Science and Technology University
